

Need to communicate?

Business Voice and Data Networking

Same-day connections for new business phone service.

VoIP offers small-to-medium sized organizations, a cost-effective way to present an impressive, professional image and keep branches or associates linked across continents. By utilizing your existing broadband internet connection and deploying VoIP hardware, you can virtually eliminate long-distance bills while increasing your contact with remote offices, telecommuters, strategic alliance partners or independent representatives, all on your virtual switchboard.

Take control of your communications infrastructure.

MCN gives you greater control by supplying top-rated equipment and materials to best suit your needs; providing detailed documentation of your project installation, conducting performance testing of all lines and connections and working in co-operation with you to keep your network operating at peak performance.

Optimize your network capacity with MCN.

MCN offers expert advice on the design of your network. Our certified installers will assess your existing infrastructure for security, redundancy and future growth needs. We carefully document each installation for your records, giving you greater control and independence. MCN regularly qualifies and updates our testing equipment, so don't hesitate to call on us to help maintain your infrastructure at the peak of performance.

MCN is a full service network and telecommunications company that is capable of handling all of your corporate telecommunication needs. When an emergency arises our response crews are ready to roll out on the shortest call out time in the industry twenty four hours a day seven days a week three hundred and sixty five days of the year. Based out of Saskatoon, Saskatchewan MCN is there to provide the best service in all locations across Western Canada.
